Pontos Swap

1. Posição comprada significa que o Cliente adquiriu um Instrumento Financeiro.

2. Posição vendida significa que o Cliente vendeu um Instrumento Financeiro.

3. A marca ao lado da taxa de pontos de Swap em pips indica se a quantia de dinheiro calculada na sua base (Equivalente em dinheiro da taxa Swap) ou adicionada (sem sinal) ou subtraída do (-) saldo da conta corrente do Cliente.

4. O equivalente em dinheiro da taxa de Pontos Swap na Conta de Investimento é expresso na Moeda da Conta após a conversão da taxa de Swap Points determinada na moeda cotada ou moeda do valor do Instrumento Financeiro como taxa de BID para posição comprada e taxa de ASK para posição vendida.

5. Os créditos ou débitos diários de pontos swap são calculados da seguinte forma:

FOREX: Valor nocional * tamanho do pip * valor dos pontos de swap * moeda da conta Taxa de câmbio

Exemplo:

instrumento: GBPUSD

moeda do contrato: GBP

volume: 0,5 lotes

moeda da conta: EUR

taxa de swap para posição longa: -0,00342%

taxa de swap para posição curta: -0,00359%

taxa de conversão da moeda da conta: GBPEUR = 1 / EURGBP = 1,16

Taxa de swap diária para posição longa = $100\,000 * 0,5 * (-0,00342\%) * 1,16 = -1,98$ EUR

Taxa de swap diária para posição curta = $100\,000 * 0,5 * (-0,00359\%) * 1,16 = -2,08$ EUR

- para outros instrumentos: Multiplicador (usado para calcular Valor Nominal de 1 Lote) *

número de lotes * Cotação Mínima Passo (em pontos) * pontos de swap valor de determinada posição *

Taxa de Câmbio utilizada para conversão da moeda da conta

Exemplo

instrumento: DE30

preço do instrumento: 15568

multiplicador: 25 EUR

volume: 0,5 lotes

moeda da conta: USD

Taxa de financiamento overnight para posição longa: -0,006752%

Taxa de financiamento overnight para posição vendida: -0,009962%

taxa de conversão da moeda da conta: EURUSD = 1,22

financiamento overnight para posição longa = $15568 * 25 * 0,5 * (-0,006752\%) * 1,22 = 16,03$ USD

financiamento overnight para posição curta = $15.568 * 25 * 0,5 * (-0,009962\%) * 1,22 = 23,65$ USD

6. Para CFDs de Ações e ETF CFD o valor dos pontos swap é expresso em percentagem por diária. O valor diário das taxas deve ser calculado da seguinte forma:

Transação nominal * taxa de swap (%) * 1/360 * taxa de conversão da moeda da conta

O método detalhado de cálculo de pontos swap para CFDs de Ações e ETFs CFD é apresentado abaixo:

- Posições longas: taxa de referência + 4,5 pontos percentuais;
- Posições curtas: 4,5 pontos percentuais - taxa de referência.

Taxa de referência será uma de seguintes:

- SOFR para instrumentos baseados em dólares americanos;
- ESTR para instrumentos baseados em euro;
- SONIA para instrumentos baseados em libras esterlinas;
- SARON para instrumentos baseados em francos suíços;
- WIBOR para instrumentos baseados em zlotys;
- PRIBOR para instrumentos baseados em coroas checas;
- CIBOR para instrumentos baseados em coroas dinamarquesas;
- STIBOR para instrumentos baseados em coroas suecas;
- NIBOR para instrumentos baseados em coroas norueguesas.

7. Para as posições curtas em CFDs de Ações e no valor CFD do ETF, os pontos swap não podem ser superiores a 0.

8. Por pontos swap entende-se a cobrança ou crédito na conta do cliente que mantém posições abertas em determinado Instrumento Financeiro para o dia seguinte.

No caso da plataforma xStation, a cobrança ou crédito com pontos de swap ocorre à meia-noite de cada dia de acordo com o cálculo do valor da diária.

No caso da plataforma Meta Trader, a cobrança ou crédito com pontos de swap de segunda a quinta-feira ocorre à meia-noite de cada dia de acordo com o cálculo do valor diário. Às sextas-feiras o valor do swap para 3 dias é cobrado / creditado, aos sábados e domingos nenhum swap é cobrado / creditado.

As regras acima não se aplicam aos instrumentos EURTRY, USDTRY, USDMXN, EURMXN, GBPMXN, EURCNH, USDCNH e USDRUB (para todas as ofertas, para ambas as plataformas de transação).

Para instrumentos EURTRY (para todas as ofertas), USDMXN (para todas as ofertas), EURMXN (para todas as ofertas), GBPMXN (para todas as ofertas), EURCNH (para todas as ofertas) e USDCNH (para todas as ofertas), os swaps são cobrados ou creditados no meia-noite de cada dia de acordo com o cálculo do valor diário, exceto quarta-feira (valor de swap para 3 dias é cobrado / creditado), sábado e domingo (nenhum swap é cobrado / creditado).

Para instrumentos USDTRY (para todas as ofertas) e USDRUB (para todas as ofertas), os swaps são cobrados ou creditados à meia-noite de cada dia de acordo com o cálculo do valor diário, exceto quinta-feira (o valor do swap para 3 dias é cobrado / creditado), sábado e domingo (nenhum swap é cobrado / creditado).

Os valores dos pontos de swap são calculados com base na disparidade da taxa de juros dos pares de moedas ou constituem o custo de manutenção do Instrumento Subjacente.

Os pontos de troca refletem a mudança do valor do dinheiro no tempo.

O valor diário dos pontos de troca deve ser calculado da seguinte forma:

$$S = (F(1) - F(0)) / 7$$

"Onde F(1) é um valor semanal futuro da taxa do instrumento calculada com base no tempo e na taxa de depósito da determinada moeda aumentada pelo mark-up da XTB; F(0) é um valor da taxa à vista de determinado instrumento financeiro."

Para Índices e Commodities, o valor diário do financiamento overnight será calculado da seguinte forma:

Posição longa: taxa básica + mark-up (%)

Posição curta: mark-up (%) - taxa básica

Dependendo do instrumento, uma das seguintes taxas de referência é aplicada como taxa de base:

- ESTR EUR para instrumentos cotados em Euro;
- SOFR USD para instrumentos cotados em dólares norte-americanos;
- SONIA GBP para instrumentos cotados em libras esterlinas;
- WIBOR 1M para instrumentos cotados em zloty polaco.

Para posições curtas em CFDs de índices, CFDs de commodities e CFDs de criptomoeda, o valor do financiamento overnight não pode ser superior a 0

9. Devido ao facto da XTB estar a operar através de um modelo de "Market maker", o limite superior do mark-up, incluído nos pontos swap, calculado pela XTB para uma determinada transação mantém-se nos

100%. Pontos swap negativos calculados pela XTB consistem num valor suportado pelos clientes para benefício da XTB.
