2. APPLICATION

This Policy applies to Retail and Professional Clients of the Company

In the case of Retail Clients, in applying the best execution in the normal course of business, we determine the best possible result in terms of total consideration. Total consideration is the price of the financial instrument concerned and the costs payable by the retail Client as a result of execution. These costs include all expenses incurred that are directly related to the execution of the order (such as execution venue fees, clearing and settlement fees and any other fees paid to third parties involved in the execution of the order). These costs do not include our own commission, spread or margin. We may take the other execution factors into account where they are instrumental in delivering the best possible result (in terms of total consideration) for the retail Client.

The application of the best execution is neither a guarantee that the best price will be obtained nor a guarantee that the transaction will be executed in full.

The EQSS and the relevant tables will remain on the Company's website for two years at least post its publication.
