### 4. Table of XTB Exchange Rates

In order to convert specific positions into the currency of client's account, in each Client's Transaction, XTB uses bid and ask rates, from the Basic Offer for all Financial Instruments on the Transaction Platform xStation and for CFD Instruments based on commodities, indices and metals on the platform MT4. Conversion of Financial Instruments, based on exchange rates of currency pairs on the Platform MT4 is performed at the rate from the given type Client's

Investment Account. The specification of individual offers can be found under the link: <https://www.xtb.com/en/trading-services/account-information/market-specification>.

If XTB does not quote a pair allowing to directly convert one of the Transaction parameters to the currency of the Investment Account, the conversion is done by converting the parameter into USD and then into the currency of the Investment Account.

XTB informs in the Fees and commissions table about additional fees that may arise.
