General provisions:

*Please check proper comment.

1. Minimum Quotation Step is the minimum value, by which the price of all quoted Financial Instruments may be changed.

2. One Lot is a transaction unit for all quoted Financial Instruments.

3. Profits and losses in Investment Account are expressed in the Account Currency after recalculation of the profits and losses established in the second currency of the pair (quote currency) or in the currency, in which the value of the Financial Instrument is expressed at the average XTB Exchange Rate. The XTB Exchange Rate is the current price of the corresponding currency pair from the STANDARD offer. The XTB Exchange Rate from Saturday 04:00 to Sunday 23:00 is the Friday close price of the corresponding currency pair from the STANDARD offer. The XTB Exchange Rate includes an additional fee, which XTB discloses in the Table of Commissions and Fees.

4. On Fridays trading on instruments in XTB is possible till 22:00. This also applies to instruments which underlying market allows trading beyond 22:00.

5. XTB reserves that Financial Instruments, for which the Underlying Instruments are actual values of stock indices or future contracts on stock indices or future contracts on commodities, are the instruments of “over-the-counter” nature and are not traded on any above-mentioned stock exchanges. Prices of aforementioned Financial Instruments are determined by XTB and reflect the actual values of stock indices (or future contracts on stock indices or future contracts on commodities), however current purchase and sale prices may differ from the levels of these instruments (or future contracts on stock indices or future contracts on commodities) quoted on organized markets.

6. Standard Transaction Spread, Minimum Order Size, Maximum Order Size, Minimum Quotation Step and Minimum Transaction Step are indicative values and they may change in case of significant volatility or limited liquidity of the Underlying Instrument.

7. Dates of position rollover between the consecutive series of the contracts are available in the Rollover Table.

8. Regarding the fact that the XTB's business activity concerns market-maker model, the upper limit of the mark-up, included in Spread which is calculated by XTB on CFD Transactions, stands at 100%. Spread calculated by XTB is a cost which is borne by Client and owed to XTB.

9. The standard transaction spread is expressed as an approximate value based on historical spread quotations during the specified hours, relevant to specific sessions. It is an indicative value and does not constitute a guarantee of order execution according to the stated spread. XTB makes reasonable efforts to ensure that the average spread values do not deviate significantly (by more than 50%) from the stated standard transaction spread values over the long term.

10. Since prices for instruments are quoted on the basis of a variable spread and reflect the current market situation, spread values over short periods can be significantly higher than the standard transaction spread. Such situations may occur due to increased volatility and/or decreased liquidity in the underlying market (especially between 23:00-00:00 CET/CEST), the publication of macroeconomic data affecting the underlying instrument market, and other non-standard, unforeseen situations in the underlying instrument market.

11. Information about the average spreads on CFD instruments is available on the XTB website in the "Legal Information" section under "Execution."

12. The underlying instrument for cash indices is an instrument that tracks the index specified in the Specification Table. Quotations for such an underlying instrument are provided by the Partner (the definition of Partner is in accordance with the General Terms and Conditions).

13. All transactions are executed as market orders.

14. The volume weighted average price (VWAP) applies to all market orders.

15. Prices are quoted on a floating basis and reflect the current market situation.

16. Remaining costs related to Transactions in XTB, such as Spread, Margin, swap points/overnight financing or other fees and commissions which shall be borne by Client and owed to XTB are described in remaining Condition Tables and Swap Point Table available on the XTB's website.

17. Trading on CFD on currencies, indices and commodities is not available during weekend, unless otherwise stated in the table above.

18. Due to lower liquidity on the market between 23:00 and 00:00 price gaps and wider spreads may occur.

19. Instrument AUT20 is available in close only mode.

Trading hours

1. Trading hours of particular Financial Instruments in the period from last Sunday of October till last Saturday of March are expressed in central european time (CET), while central european summer time (CEST) is used to express trading hours in period from last Sunday of March till last Saturday of October.
